**Description**

Hi Ryan,

If $! is not nil, returns in the block of the at_exit method in MiniTest::Unit.autorun. Then raises LocalJump exception.

```ruby
def self.autorun
  at_exit { return if $! # don't run if there was an exception
    exit_code = MiniTest::Unit.new.run(ARGV)
    exit false if exit_code && exit_code != 0
  } unless @@installed_at_exit
  @@installed_at_exit = true
end
```

The attached patch will fix the problem.

  def self.autorun
  at_exit { return if $! # don’t run if there was an exception
    exit_code = MiniTest::Unit.new.run(ARGV)
-  exit false if exit_code && exit_code != 0
+  exit false if exit_code && exit_code != 0
   } unless @@installed_at_exit
   @@installed_at_exit = true

```

Thanks, kouji.
