Can this be applied, please? We need this patch for Fedora [1].

Thank you for reminding, Vit.
Do you need only tk-diff-ruby-2.1.3-p242.for-SEGV-only?
If so, I can merge it.

Yep, that should be enough.
Actually since I noticed this backport ticket with the patch too late, I already applied patch [1] to our package. But these are the same, I just stripped a few additional hunks with DUMPs which seems unimportant.
