

Ruby trunk - Bug #10630

ERB tags nested in escaped blocks are skipped

12/22/2014 09:48 AM - tonci (Tonči Damjanić)

Status:	Third Party's Issue	
Priority:	Normal	
Assignee:	ruby-core	
Target version:	2.6	
ruby -v:	2.3.5	Backport: 2.0.0: UNKNOWN, 2.1: UNKNOWN
Description		
Hello,		
First of all, is this a good place to report Erubis bugs? Their GitHub repo is stale (no action since 2011) and I was suggested by the Rails team to try here.		
GitHub ticket: https://github.com/kwatch/erubis/issues/6		
Repro example: https://github.com/rails/rails/issues/18098#issuecomment-67667400		
It seems that ERB (Erubis) doesn't handle well tags embedded within another tag. My goal is to produce ERB code with some values prefilled in the first pass.		
Input ERB code:		
<pre><div> <%= Results: <%= 'first' %> <%= 'second' %> <%= 'third' %> %> </div></pre>		
Produces the following output:		
<pre><div> <%= Results: <%= 'first' %> second third %> </div></pre>		
Expected output is:		
<pre><div> <%= Results: first second third %> </div></pre>		
The first nested ERB tag is skipped. The same happens when there is just one block nested.		
This is reproducible in Rails v4.1.8, which is using Erubis v2.7.0.		

History

#1 - 12/22/2014 11:47 AM - nobu (Nobuyoshi Nakada)

- Status changed from Open to Third Party's Issue

Erubis is not a part of ruby repository.
We can do nothing for it.

#2 - 12/22/2014 01:48 PM - tonci (Tonči Damjanić)

OK. Who is maintaining Erubis then? Is it possible to reach out to them and have the bug fixed?

The Erubis repo is stale and the project seems to be deprecated by the author.

#3 - 12/23/2014 01:39 AM - nobu (Nobuyoshi Nakada)

Nobody would maintain deprecated projects.

#4 - 12/30/2014 01:41 PM - tonci (Tonči Damjanić)

Yes, I understand that, but doesn't that fact affect future Ruby releases?

#5 - 12/31/2014 04:36 AM - nobu (Nobuyoshi Nakada)

No.

#6 - 11/07/2017 02:36 PM - tonci (Tonči Damjanić)

- *ruby -v changed from 2.1.5 to 2.3.5*

- *Status changed from Third Party's Issue to Open*

Reopening, since there is movement on the ERB front in the upcoming v2.5.0.

#7 - 11/08/2017 02:10 AM - nobu (Nobuyoshi Nakada)

- *Status changed from Open to Rejected*

It seems an Erubis specific bug.
ERB hasn't had that issue.

#8 - 11/08/2017 02:09 PM - k0kubun (Takashi Kokubun)

- *Status changed from Rejected to Third Party's Issue*

ERB (Erubis)

ERB and Erubis are totally different things.

```
$ irb -rerb -rerubis -rerubi
irb(main):001:0> RUBY_VERSION
=> "2.5.0"
irb(main):002:0> erb = "<div><%= Results: <%= 'first' %> | <%= 'second' %> | <%= 'third' %> %></div>"
=> "<div><%= Results: <%= 'first' %> | <%= 'second' %> | <%= 'third' %> %></div>"
irb(main):003:0> ERB.new(erb).result
=> "<div><%= Results: first | second | third %></div>"
irb(main):004:0> Erubis::Eruby.new(erb).result
=> "<div><%= Results: <%= 'first' %> | second | third %></div>"
irb(main):005:0> eval Erubi::Engine.new(erb).src
=> "<div><%= Results: <%= 'first' %> | second | third %></div>"
```

As you can see, ERB (which is included in Ruby core) is working as expected, and Erubis (used in older Rails) and Erubi (used in recent Rails) are not.

So you should report this to:

Erubis: <https://github.com/kwatch/erubis>

Erubi: <https://github.com/jeremyevans/erubi>

#9 - 11/09/2017 07:10 PM - tonci (Tonči Damjanić)

Thanks!

I've reported it to Erubis a while back (<https://github.com/kwatch/erubis/issues/6>), but since that project is stale, I've reported it to Erubi as well (<https://github.com/jeremyevans/erubi/issues/11>).
