

Ruby master - Misc #10791

[PATCH 1/1] Remove unnecessary passing value from doc for Observable

01/27/2015 07:43 PM - gogotanaka (Kazuki Tanaka)

Status:	Assigned	
Priority:	Normal	
Assignee:	docs	
Description		
Hi, when reading doc for Observable, I notice little unnecessary code which may cause little confusion in example. take your time. gogo.		

History

#1 - 04/09/2017 09:57 PM - stomar (Marcus Stollsteimer)

In case this might get applied (I'm not sure whether it's necessary): the @symbol variable is also mentioned in the example's description and used in the initialize method; these parts would have to be changed, too.

#2 - 08/10/2018 10:51 AM - hsbt (Hiroshi SHIBATA)

- Assignee set to docs

- Status changed from Open to Assigned
