Description
=end
The ruby used for cgi in webrick is not configurable.

This patch allows the ruby binary to be configurable so that ruby does not need to be installed to use webrick cgi.

This also fixes webrick tests.

Hi,

The ruby used for cgi in webrick is not configurable.

This patch allows the ruby binary to be configurable so that ruby does not need to be installed to use webrick cgi.

This also fixes webrick tests.

I guess the feature is just for ruby-core maintenance, but the maintenance is very important :-)

In addition, the feature is trivial.

So I think you can commit it as "nodoc" feature.

r26299 overrides RbConfig.ruby at test/ruby/envutil.rb for test environment. I think that fix is enough for the original intent of the patch by Aaron. Sorry for this result.
