[PATCH 1/2] variable.c: extract common functions for generic ivar
http://80x24.org/spew/m/4e9df8a150a121c894fe142bde5e4c15d43e5e94.txt

[PATCH 2/2] variable.c: use indices for generic ivars
http://80x24.org/spew/m/aabb09c886a23ea496722b13f2b39da8606b8180.txt

This reduces memory overhead of ivars for common types such as T_DATA the same way T_OBJECT does it.

For 9992 accepted clients on an OpenSSL server, this reduces RSS memory from 77160K to 69248K on x86-64 with the attached ossl.rb script. Connecting client process was reduced from 246312K to 230724K RSS.

OpenSSL 1.0.1e-2+deb7u16 on Debian 7
This reduces memory overhead of ivars for common types such as T_DATA the same way T_OBJECT does it.

For 9992 accepted clients on an OpenSSL server, this reduces memory from 77160K to 69248K with the script in https://bugs.ruby-lang.org/issues/11170

Revision 6cd5825 - 05/30/2015 12:20 AM - normal
variable.c: avoid compatibility table with generic ivars

This recovers and improves performance of Marshal.dump/load on Time objects compared to when we implemented generic ivars entirely using st_table.
This also recovers some performance on other generic ivar objects, but does not bring Marshal.dump/load performance up to previous speeds.

benchmark results:
minimum results in each 10 measurements.
Execution time (sec)
name trunk geniv after
marshal_dump_flo 0.343 0.334 0.335
marshal_dump_load_geniv 0.487 0.527 0.495
marshal_dump_load_time 1.262 1.401 1.257

Speedup ratio: compare with the result of 'trunk' (greater is better)
name geniv after
marshal_dump_flo 1.026 1.023
marshal_dump_load_geniv 0.925 0.985
marshal_dump_load_time 0.901 1.004

- include/ruby/intern.h (rb_generic_ivar_table): deprecate
- internal.h (rb_attr_delete): declare
- marshal.c (has_ivars): use rb_ivar_foreach (w_iivar): ditto (w_object): update for new interface
- time.c (time_mload): use rb_attr_delete
- variable.c (generic_ivar_delete): implement (rb_ivar_delete): ditto (rb_attr_delete): ditto [ruby-core:69323] [Feature #11170]

History
#1 - 05/23/2015 01:35 AM - normalperson (Eric Wong)
- File ossl_11170.rb added

Attached standalone test script, increase "ulimit -n" as necessary.

#2 - 05/23/2015 02:19 AM - ko1 (Koichi Sasada)
+1.

T_CLASS/T_MODULE can use same technique, but it seems not so many use-cases.

#3 - 05/29/2015 12:58 AM - normalperson (Eric Wong)
After the original patch, rb_generic_ivar_table() is much more expensive but kept for compatibility reasons. I propose deprecating it, I'm not sure if any 3rd party C-exts use it.

[PATCH 3/2] avoid compatibility table with generic ivars

This recovers and improves performance of Marshal.dump/load on Time objects compared to when we implemented generic ivars entirely using st_table.

This also recovers some performance on other generic ivar objects, but does not bring bring Marshal.dump/load performance up to previous speeds.

benchmark results:
minimum results in each 10 measurements.
Execution time (sec)
name trunk geniv after
marshal_dump_flo 0.343 0.334 0.335
marshal_dump_load_geniv 0.487 0.527 0.495
marshal_dump_load_time 1.262 1.401 1.257
variable.c: use indices for generic ivars

This reduces memory overhead of ivars for common types such as T_DATA the same way T_OBJECT does it.

For 9992 accepted clients on an OpenSSL server, this reduces memory from 77160K to 69248K with the script in https://bugs.ruby-lang.org/issues/11170
