Revision 6cd5825 - 05/30/2015 12:20 AM - normal
variable.c: avoid compatibility table with generic ivars

This recovers and improves performance of Marshal.dump/load on Time objects compared to when we implemented generic ivars entirely using st_table.
This also recovers some performance on other generic ivar objects, but does not bring Marshal.dump/load performance up to previous speeds.

benchmark results:
minimum results in each 10 measurements.
Execution time (sec)
name    trunk   geniv   after
marshal_dump_flo        0.343   0.334   0.335
marshal_dump_load_geniv 0.487   0.527   0.495
marshal_dump_load_time  1.262   1.401   1.257

Speedup ratio: compare with the result of ‘trunk’ (greater is better)
name    geniv   after
marshal_dump_flo        1.026   1.023
marshal_dump_load_geniv 0.925   0.985
marshal_dump_load_time  0.901   1.004

History

#1 - 05/23/2015 01:35 AM - normalperson (Eric Wong)
- File ossl_11170.rb added

Attached standalone test script, increase "ulimit -n" as necessary.

#2 - 05/23/2015 02:19 AM - ko1 (Koichi Sasada)
+1.

T_CLASS/T_MODULE can use same technique, but it seems not so many use-cases.

#3 - 05/29/2015 12:58 AM - normalperson (Eric Wong)
After the original patch, rb_generic_ivar_table() is much more expensive but kept for compatibility reasons. I propose deprecating it, I'm not sure if any 3rd party C-exts use it.

[PATCH 3/2] avoid compatibility table with generic ivars

This recovers and improves performance of Marshal.dump/load on Time objects compared to when we implemented generic ivars entirely using st_table.

This also recovers some performance on other generic ivar objects, but does not bring Marshal.dump/load performance up to previous speeds.

benchmark results:
minimum results in each 10 measurements.

**#4 - 05/29/2015 11:43 PM - Anonymous**

- Status changed from Open to Closed

Applied in changeset r50678.

---

variable.c: use indices for generic ivars

This reduces memory overhead of ivars for common types such as T_DATA the same way T_OBJECT does it.

For 9992 accepted clients on an OpenSSL server, this reduces memory from 77160K to 69248K with the script in https://bugs.ruby-lang.org/issues/11170

- variable.c (static int special_generic_ivar): move (rb_generic_ivar_table); rewrite for compatibility (gen_ivtbl_bytes); new function (generic_ivar_get); update to use ivar index (generic_ivar_update); ditto (generic_ivar_set); ditto (generic_ivar_defined); ditto (generic_ivar_remove): ditto (rb_mark_generic_ivar); ditto (givar_j): ditto (rb_free_generic_ivar): ditto (rb_mark_generic_ivar_tbl): ditto (rb_generic_ivar_memsize): ditto (rb_copy_generic_ivar): ditto (rb_ivar_set): ditto (rb_ivar_foreach): ditto (rb_ivar_count): ditto (givar_mark_j): remove (gen_ivtbl_mark); new function (gen_ivar_each): ditto (iv_index_tbl_extend): update for struct ivar_update (iv_index_tbl_newsize): ditto [ruby-core:69323] [Feature #11170]
