

Ruby master - Bug #11403

Segmentation fault when running Rails Server

07/29/2015 05:49 AM - hussain.md1@tcs.com (Athar Hussain)

Status: Rejected	
Priority: Normal	
Assignee:	
Target version:	
ruby -v: ruby 2.2.2p95 (2015-04-13 revision 50295) [x86_64-darwin14]	Backport: 2.0.0: UNKNOWN, 2.1: UNKNOWN, 2.2: UNKNOWN
Description I have newly installed ruby and rails in my new MAC 10.10 But when I am trying to run am rails application its showing this segmentation fault <pre>qaz admin\$ rails server Warning: Running `gem pristine --all` to regenerate your installed gems specs (and deleting then re installing your bundle if you use bundle --path) will improve the startup performance of Spring. * /Users/admin/.rvm/gems/ruby-2.2.1/gems/json-1.8.3/lib/json/ext/parser.bundle: ***[BUG] Segmentation fault at 0x00000000000418*** Abort trap: 6</pre>

But when I am trying to run am rails application its showing this segmentation fault

```
qaz admin$ rails server
Warning: Running `gem pristine --all` to regenerate your installed gems specs (and deleting then re installing your bundle if you use bundle --path) will improve the startup performance of Spring.
* /Users/admin/.rvm/gems/ruby-2.2.1/gems/json-1.8.3/lib/json/ext/parser.bundle: ***[BUG] Segmentation fault at 0x00000000000418***
ruby 2.2.2p95 (2015-04-13 revision 50295) [x86_64-darwin14]
```

Hi Athar,

For some reason you have a setup that is using RVM on 2.2.1 and rbenv on 2.2.2. You might want to drop one of them and reinstall your gems.

HTH.
