

Ruby master - Feature #11583

Add File#unlink

10/12/2015 04:32 AM - ksss (Yuki Kurihara)

Status:	Open
Priority:	Normal
Assignee:	
Target version:	
Description	
I propose new method File#unlink .	
File#unlink is same as Fille.unlink like this.	
<pre>class File def unlink File.unlink(path) end end</pre>	
It is more objective. And will be able to write duck typeing with Tempfile#unlink	
<pre>- Tempfile.open do f + Tempfile.create do f f.unlink # Not raise an error end</pre>

History

#1 - 10/12/2015 05:29 AM - kosaki (Motohiro KOSAKI)

Unix can unlink an opened file, but windows doesn't. usa-san, what do you think about this patch?

#2 - 10/12/2015 05:40 AM - usa (Usaku NAKAMURA)

Of course, it's nonsense for me.

#3 - 10/12/2015 07:09 AM - nobu (Nobuyoshi Nakada)
