| Description | |
| Tempfile.new have default basename from 2.3.0 | |
| https://github.com/ruby/ruby/commit/05c108cdba62545bb50616726f0b7261cb89ad4e | |
| So, I propose that Tempfile.create also set default basename. | |

I also wanted to have default basename parameter for Tempfile.create as Tempfile.new, and found this issue. I believe nobody have objections to this change, so committed to trunk.

If anyone has any objections, please let me know.
Thanks for the patch!
