| Description | |
| <pre>module Mod @foo = {} def self.foo(k) @foo[k] end def self.foo=(k, v) @foo[k] = v end end Mod1.foo(:key1) = 'vall1'</pre> | |

History

#1 - 02/21/2016 04:54 AM - nobu (Nobuyoshi Nakada)

This is a longstanding pending feature.

#2 - 02/22/2016 03:56 PM - bughit (bug hit)

- Subject changed from parameterized property assignment: o.prop(arg) = 1 to parameterized property assignment: o.prop(arg) = 1

What is its status? Is there an existing issue for it?

#3 - 03/17/2016 07:05 AM - shyouhei (Shyouhei Urabe)

I met nobu so I asked its status. He told me that this proposed syntax conflicted catastrophically with existing grammars when he tried this last time.

He said he'll try again.
