

Ruby master - Feature #12386

Move definition of ONIG_CASE_MAPPING compilation switch outside onigumo files

05/16/2016 10:55 AM - duerst (Martin Dürst)

Status:	Closed
Priority:	Normal
Assignee:	duerst (Martin Dürst)
Target version:	
Description	
<p>At r55018, in include/ruby/oniguruma.h, at line 131, I introduced the compilation switch ONIG_CASE_MAPPING. The purpose of this switch is to isolate the case-mapping functionality that is introduced into Ruby but is not used with regular expressions.</p> <p>The definition on line 131 should be moved outside oniguruma.h, to a location that makes sure it is seen in oniguruma.h and all files that include it, but will not be part of backwards pull requests to onigumo. Such a location may either be an option setting in some make file or a suitable .h file included into oniguruma.h. I trust Nobu to find the best location for this.</p>

History

#1 - 07/19/2016 08:16 AM - naruse (Yui NARUSE)

- Assignee changed from nobu (Nobuyoshi Nakada) to duerst (Martin Dürst)

- Status changed from Open to Assigned

The upstream of Ruby's regexp is [Onigmo's ruby branch](#).

It is much different from master.
Therefore an extra ifdef, ONIG_CASE_MAPPING, is not needed.
Just write without ifdefs.

#2 - 07/24/2016 07:33 AM - duerst (Martin Dürst)

- Status changed from Assigned to Closed

Applied in changeset r55740.

- regenc.h/c, include/ruby/oniguruma.h, enc/ascii.c, big5.c, cp949.c, emacs_mule.c, euc_jp.c, euc_kr.c, euc_tw.c, gb18030.c, gbk.c, iso_8859_1|2|3|4|5|6|7|8|9|10|11|13|14|15|16.c, koi8_r.c, koi8_u.c, shift_jis.c, unicode.c, us_ascii.c, utf_16|32be|le.c, utf_8.c, windows_1250|51|52|53|54|57.c, windows_31j.c, unicode.c: Remove conditional compilation macro ONIG_CASE_MAPPING.
