Hi,
I would send my patch to fix this.
Could you check it?
Thanks.

And missing/streerror.c.

You can use `find -exec {} +` and `grep -l`, or `grep -r --include`.

```
find . \( -name "*.ch" -o -name "*.src" \) -exec grep -li 'public[ -]domain' {} +
grep -lri 'public[ -]domain' --include="*.ch" --include="*.src"
git --no-pager grep -l -i 'public[ -]domain' -- "*.ch" "*.src"
```

And missing/streerror.c.

You can use `find -exec {} +` and `grep -l`, or `grep -r --include`.

Yes, its file is included too. Thanks, I missed it. and the grep options looks better than "sort | uniq". I will take a note of it. :)
