

Ruby trunk - Feature #12747

Add TracePoint#callee_id

09/10/2016 06:36 AM - ktsj (Kazuki Tsujimoto)

Status:	Closed
Priority:	Normal
Assignee:	ko1 (Koichi Sasada)
Target version:	
Description	
Abstract	
<p>I propose to add TracePoint#callee_id which returns the called name of the method.</p>	
<pre>def m end alias am m TracePoint.new(:call) do tp p [tp.method_id, tp.callee_id] #=> [:m, :am] end.enable do am end</pre>	
Background	
<p>We can get callee id by tp.binding.eval('__callee__'), but it is slow(10x~) and can't get callee id of CFUNC.</p>	
<pre>class Object alias aitself itself end TracePoint.new(:c_call) do tp p [tp.method_id, tp.binding.eval('__callee__')] #=> [:itsself, nil] end.enable do aitself end</pre>	
Implementation	
<p>I attached 2 patches.</p>	
<ul style="list-style-type: none">• 0001-TracePoint-method_id-should-return-method_id-not-cal.patch<ul style="list-style-type: none">◦ Now, TracePoint#method_id returns not only method id(__method__) but callee id. This patch makes TracePoint#method_id return method id always, so it introduces some incompatibility.• 0002-Add-TracePoint-callee_id.patch<ul style="list-style-type: none">◦ Add TracePoint#callee_id.	
Usecase	
<p>power_assert gem wants this method to get column number of each method calls.</p>

History

#1 - 10/11/2016 09:22 AM - shyouhei (Shyouhei Urabe)

- Assignee set to ko1 (Koichi Sasada)
- Status changed from Open to Assigned

#2 - 11/03/2016 04:53 AM - ko1 (Koichi Sasada)

Sorry for late response.

I missed incompatibility.
How about to commit it before next preview and ask feedback from users?

Thank,
Koichi

#3 - 11/05/2016 01:15 PM - ktsj (Kazuki Tsujimoto)

- Status changed from Assigned to Closed

Applied in changeset r56592.

- eval.c, method.h, proc.c, vm.c, vm_eval.c, vm_inshelper.c, vm_method.c:
 TracePoint#method_id should return method_id, not callee_id.
 [ruby-core:77241] [Feature #12747]
- test/ruby/test_settracefunc.rb: change accordingly.

#4 - 11/05/2016 01:17 PM - ktsj (Kazuki Tsujimoto)

Thank you, I committed.

#5 - 12/03/2016 08:50 AM - rhenium (Kazuki Yamaguchi)

r56593 changed the signature of `rb_frame_method_id_and_class()` which is exposed to C extensions. For example, this broke `ruby-prof` gem. Is this intentional?

#6 - 12/03/2016 12:40 PM - ktsj (Kazuki Tsujimoto)

Thanks Yamaguchi-san, good catch.

I'll revert `rb_frame_method_id_and_class`.
