

Ruby master - Bug #13708

catastrophic slow compilation of defined-defined sequence has no chance to ^C

07/03/2017 03:35 AM - shyouhei (Shyouhei Urabe)

Status: Open	
Priority: Normal	
Assignee:	
Target version:	
ruby -v:	Backport: 2.2: UNKNOWN, 2.3: UNKNOWN, 2.4: UNKNOWN

Description

Attached script, which is only 139 bytes long, generates iseq of 352,321,600 bytes on my 64bit machine. That compilation takes long time.

Execution itself is almost instant, though.
