Ruby master - Bug #13752

Can't observe sibling refinements

07/18/2017 06:27 AM - shyouhei (Shyouhei Urabe)

**Description**

Sorry in advance if already reported elsewhere, but is this intentional?

```ruby
class Foo
  using Module.new {
    refine Foo do
      def foo
        puts "foo"
      end
    end
  }

  using Module.new {
    refine Foo do
      def bar
        foo
      end
    end
  }

  new.bar
end
```

**History**

#1 - 10/18/2019 12:24 AM - jeremyevans0 (Jeremy Evans)

- Status changed from Assigned to Closed

This appears to be fixed in the master branch (printing foo), though it is still broken in 2.6. Not sure what commit fixed it.
