

Ruby master - Bug #14046

Ripper loses DATA

10/24/2017 08:15 AM - mjago (Martyn Jago)

Status: Open	
Priority: Normal	
Assignee:	
Target version:	
ruby -v: ruby 2.5.0dev (2017-10-19 trunk 60213) [x86_64-darwin13]	Backport: 2.3: UNKNOWN, 2.4: UNKNOWN
Description	
Since the following is a valid self-contained script:	
<pre>p DATA.read # comment __END__ abc</pre>	
should the <code>__END__</code> suffix data be preserved with <code>:on__end__</code> ?	
Alternatively should there be an <code>:on_ignored__end</code> token to preserve DATA?	
Notably the comment content is preserved:	
<pre>[[[1, 0], :on_ident, "p", EXPR_CMDARG], [1, 1], :on_sp, " ", EXPR_CMDARG], [1, 2], :on_const, "DATA", EXPR_ARG], [1, 6], :on_period, ".", EXPR_DOT], [1, 7], :on_ident, "read", EXPR_ARG], [1, 11], :on_sp, " ", EXPR_ARG], [1, 12], :on_comment, "# comment\n", EXPR_ARG], [2, 0], :on__end__, "__END__\n", EXPR_BEG]]</pre>
