

Backport187 - Bug #1428

Net/http issue

05/02/2009 05:41 AM - manu (Emmanuel Pinault)

Status:	Closed
Priority:	Normal
Assignee:	
Target version:	
ruby -v:	1.8.7-p160 and ruby 1.8.7-p72
Description	
<pre>=begin I have been using Net/http on the same distro (ubuntu 9.04 and 8.04 with both version) with the most recent version of 1.8.6 and 1.8.7, but it seems that a regression has been introduced somehow. I am using Net/Http to perform POST against the same web server and it use to work fine with 1.8.6 any version. I have seen few post about improving the speed of it. I am wondering if those change could have affected the way POST are being sent. In fact, the same interface I am doing POST against, slight change on some of the value passed to that Interface behave correctly on 1.8.6 but do not with 1.8.7 i.e: http://myurl/PARENTAL=Off&USER=BILLY vs i.e: http://myurl/PARENTAL=OFF&USER=BILLY and on 1.8.6 I get the expected response on with both URL, but on 1.8.7, I get a different response while I should be getting the same response , like in 1.8.6.. I am wondering if the way socket have been optimized is causing some issues? I have done a wireshark on it and could not see anything obvious on the HTTP level.. so it must be at a lower level I believe. =end</pre>
