

## Ruby master - Bug #14562

### Do not warn for assignment in conditionals inside ()

03/01/2018 01:15 AM - matsuda (Akira Matsuda)

<b>Status:</b> Closed	
<b>Priority:</b> Normal	
<b>Assignee:</b>	
<b>Target version:</b>	
<b>ruby -v:</b> ruby 2.6.0dev (2018-03-01 trunk 62617) [x86_64-darwin16]	<b>Backport:</b> 2.3: UNKNOWN, 2.4: UNKNOWN, 2.5: UNKNOWN
<b>Description</b> Ruby warns against this code, which is very helpful. <pre>% ruby -we 'if a=1; p a; end' -e:1: warning: found = in conditional, should be == 1</pre> <p>So there's a commonly known practice. In order to express that we're intentionally assigning (not missing one more = sign), we usually add parens around the assignment.</p> <p>But in fact, Ruby still warns...</p> <pre>% ruby -we 'if (a=1); p a; end' -e:1: warning: found = in conditional, should be == 1</pre> <p>Can this behavior changed not to warn when parenthesized?</p>	
<b>Related issues:</b> Has duplicate Ruby master - Feature #15848: Silence warning when conditional ... <b>Rejected</b>

parse.y: refine assign\_in\_cond warning

- parse.y (assign\_in\_cond): refine a warning message for assignment of a literal in conditional expression. [ruby-core:85872] [Bug #14562]

#### History

##### #1 - 03/01/2018 03:47 AM - nobu (Nobuyoshi Nakada)

Just remove if.

It is the warning for assignment of a **literal**, which is not "conditional".

##### #2 - 03/01/2018 04:10 AM - nobu (Nobuyoshi Nakada)

- Status changed from Open to Closed

Applied in changeset [trunk|r62620](#).
