Partially backport r63300: Make --with-soname actually work on macOS

06/01/2018 08:26 AM - knu (Akinori MUSHA)

Status: Closed
Priority: Normal
Assignee: nagachika (Tomoyuki Chikanaga)
Target version:
ruby -v: 
Backport: 2.3: REQUIRED, 2.4: REQUIRED, 2.5: REQUIRED

Description
r63300 was mainly about changing the default names, but also included a fix for --with-soname to take effect.
So, please partially backport r63300 to 2.3, 2.4 and 2.5 using the attached patches.
Merging this along with #14803 makes --with-soname actually work on macOS.

History

- Assignee set to nagachika (Tomoyuki Chikanaga)
Can this be merged before the next teeny releases, along with #14803?

#2 - 10/17/2018 03:03 AM - knu (Akinori MUSHA)
- Status changed from Open to Closed
On second thought, there's little point in fixing a rarely used install option in past versions and I don't really have the time to test this all over again right now. I'm closing this!
