Ruby master - Misc #14981

DevelopersMeeting20180913Japan

08/10/2018 07:08 AM - ko1 (Koichi Sasada)

Status: Closed
Priority: Normal
Assignee:

Description
Please comment your favorite ticket numbers you want to ask to discuss with your SHORT comment or summary. (your summary/comment will help us because we don't need to read all of ticket comments)

DO NOT discuss then on this ticket, please.

Date: 2018/09/13 (Thu)
Time: 14:00-18:00 (JST)
Place: Cookpad Inc. (Tokyo, Japan)
Sign-up: https://ruby.connpass.com/event/97843/
log: https://docs.google.com/document/d/1RgKID1quTYC6AbhCQxs_bRiViyeflBFeFA--KwLEx10/pub
logedit: https://docs.google.com/document/d/1RgKID1quTYC6AbhCQxs_bRiViyeflBFeFA--KwLEx10/edit
Past meetings: https://bugs.ruby-lang.org/projects/ruby/wiki#Developer-Meetings

NOTES

- Dev meeting IS NOT a decision making place. All decisions should be done at the bug tracker.
- Dev meeting is a place we can ask Matz, nobu, nurse and other developers directly.
- Matz is a very busy person. Take this opportunity to ask him. If you can not attend, other attendees can ask instead of you (if attendees can understand your issue).
- We will write a log about discussion to a file or to each ticket in English.
- All activities are best-effort (keep in mind that most of us are volunteer developers).
- The date, time and place is scheduled according to when/where we can reserve Matz’s time.

Agenda

Next dev-meeting

About 2.6 timeframe

Carry-over from previous meeting(s)

From Attendees

From non-attendees

Comment format

Please comment your favorite ticket we need to discuss with the following format.

* [Ticket ref] Ticket title (your name)
  * your comment why you want to put this ticket here if you want to add.
Your comment is very important if you are not an attendee because we cannot ask why you want to discuss about it.

Example:

* [Feature #14609] `Kernel#p` without args shows the receiver (ko1)
  * I feel this feature is very useful and some people say :+1: so let discuss about this feature.

I don't guarantee to put tickets in agenda if the comment violate the format (because it is hard to copy & paste).

#11 - 09/03/2018 01:07 AM - shyouhei (Shyouhei Urabe)

- [https://github.com/ruby/ruby/pull/1943](https://github.com/ruby/ruby/pull/1943)
  - I want a review by other core devs.

#12 - 09/03/2018 07:39 AM - nobu (Nobuyoshi Nakada)

- [Feature #14850](https://github.com/ruby/ruby/pull/1943) Add official API for setting timezone on Time (nobu)
  - a patch posted.

#13 - 09/04/2018 09:10 AM - chopraanmol1 (Anmol Chopra)

- [Bug #14908](https://github.com/ruby/ruby/pull/1943) Enumerator::Lazy creates unnecessary Array objects
  - Proposed solution is to change arity of Enumerator::Yielder#<< to 1 from -1 and use it internally for lazy enum instead of
    Enumerator::Yielder#yield. Generally, method << is used with only one parameter changing arity to 1 also makes it consistent with other
    classes (String, Array)
  - Since, proposed solution involves spec changes (Enumerator::Yielder#<<'s arity) a discussion is requested before the provided patch can
    proceed.

#14 - 09/10/2018 11:21 PM - aherek (Pavel Rosicky)

- [Feature #13167](https://github.com/ruby/ruby/pull/1943) Dir.glob is 25x slower since Ruby 2.2 (ahorek)
  - improves performance of a glob pattern with braces, especially on windows but also on other platforms
  - the idea was already approved by matz (Yukihiro Matsumoto)#13873 but later revered (incompatibility of the order)
  - attached patch don't have the same problem

#15 - 09/11/2018 09:42 AM - znz (Kazuhiro NISHIYAMA)

- Description updated

#16 - 09/12/2018 08:32 PM - normalperson (Eric Wong)

- [Feature #13618](https://github.com/ruby/ruby/pull/1943) auto-fiber name, is "Thread::Coro" OK? How should Mutex work between coroutines? Queue/SizedQueue works, now (not
  sure about signal handler).

#17 - 09/13/2018 05:09 AM - naruse (Yui NARUSE)

- Description updated

#18 - 09/13/2018 08:17 AM - aycabta (aycabta )

- [Feature #15114](https://github.com/ruby/ruby/pull/1943) Ruby 定義したメソッドに &:hoge を渡しても refinements が有効にならない

#19 - 11/14/2018 04:34 AM - hsbt (Hirosi SHIBATA)

- Status changed from Open to Closed
