Ruby master - Bug #15038

Appveyor MinGW - bundled gems missing?

08/28/2018 04:17 PM - MSP-Greg (Greg L)

---

**Status:** Closed  
**Priority:** Normal  
**Assignee:** hsbt (Hiroshi SHIBATA)  
**Target version:** ruby -v: ruby 2.6.0dev (2018-08-28 trunk 64586) [x64-mingw32]  
**Backport:** 2.3: UNKNOWN, 2.4: UNKNOWN, 2.5: UNKNOWN

**Description**

I just noticed that the Appveyor MinGW build is not showing the installed bundled gems in the console output, although the mswin build is.

See r64585 test, mswin vs mingw.

Since this part of the install recently broke, I checked an earlier rev (r64550), and it shows the same thing, (mswin ok, mingw missing.)

It's been a long time since I needed to revise the bundled gem code in ruby-loco, and it's set up to cache the gems on Appveyor & also if one is building locally.

I don't know if this is considered an issue, but someone trying to build locally using the scripts might be surprised.

Thanks, Greg

Both AppVeyor CI jobs now show the bundled gems, so hopefully this can be closed:
