

## Ruby master - Bug #1510

### [patch] String#partition can return wrong result or crash

05/25/2009 07:36 AM - marcandre (Marc-Andre Lafortune)

<b>Status:</b> Closed	
<b>Priority:</b> Normal	
<b>Assignee:</b>	
<b>Target version:</b> 1.9.2	
<b>ruby -v:</b> ruby 1.9.2dev (2009-05-24 trunk 23557) [i386-darwin9.7.0]	<b>Backport:</b>
<b>Description</b> =begin The attached patch fixes a problem that occurs when the argument of String#partition needs to be converted using :to_str.  E.g:  class C def to_str "foo" end end p "foo-bar".partition(C.new)  Before patch: ["", #, "foo-bar"]  After patch: ["", "foo", "-bar"]  RubySpecs has been updated. Without the version guard, it crashes Ruby. =end	

#### History

##### #1 - 05/25/2009 07:57 AM - nobu (Nobuyoshi Nakada)

- Status changed from Open to Closed

- % Done changed from 0 to 100

=begin  
Applied in changeset r23562.  
=end

##### #2 - 05/25/2009 08:00 AM - marcandre (Marc-Andre Lafortune)

=begin  
Thanks, that was really quick!  
I just noticed that rpartition has the same problem...  
=end
