

Ruby trunk - Bug #15221

Segfault in Ruby VM

10/11/2018 12:22 PM - jmreid (Justin Reid)

Status: Open	
Priority: Normal	
Assignee:	
Target version:	
ruby -v: ruby 2.5.1p57 (2018-03-29 revision 63029) [x86_64-darwin18]	Backport: 2.3: UNKNOWN, 2.4: UNKNOWN, 2.5: UNKNOWN

Description

Ruby is segfaulting randomly for me on MacOS 10.14 (18A391).

I don't have a script to reproduce the error as it seems to pop up randomly. But I was able to grab the stack trace (attached). It appears to be related to GC.
