

## Ruby trunk - Bug #15276

### URI.join behaviour is unintuitive

11/01/2018 03:59 PM - vihai (Daniele Orlandi)

<b>Status:</b> Open	
<b>Priority:</b> Normal	
<b>Assignee:</b>

<b>ruby -v:</b> 2.5.1p57	<b>Backport:</b> 2.3: UNKNOWN, 2.4: UNKNOWN, 2.5: UNKNOWN
<b>Description</b> Hello,  I've been bitten by issue <a href="#">#10075</a> , I actually expected a different behaviour from <code>::join</code> . It doesn't IMHO respect the "principle of least surprise".  I agree with avdi who suggests to deprecate <code>::join</code> and replace it with a more intuitive name, while adding another method that performs path concatenation (which I think it is a more common scenario).  Please consider this, Thank you!

What name would you suggest? Avdi mentioned the name `#merge_path` - is this the name that you suggest? (I ask specifically because finding a good name is not always easy. And in the proposal no specific name was mentioned as such.)
