

Ruby trunk - Feature #15326

Proposal: Enable refinements to `#public_send`

11/21/2018 01:16 PM - osyo (manga osyo)

| Description | |
| Sometimes we use <code>#public_send</code> rather than <code>#send</code> to avoid calling the private method. | |
| <pre>def meth(a) # Not call private method # Use #public_send a.public_send(a.name) end</pre> | |
| However, <code>#send</code> support to refinements, but <code>#public_send</code> does not support refinements. | |
| <pre>class X def name "hoge" end end module Ex refine X do def hoge # ... end end end using Ex def meth(a) # Not call private method # Use #public_send a.public_send(a.name) end # Error: undefined method `hoge' for #<X:0x0000561a8cc7e280> (NoMethodError) meth X.new</pre> | |
| <code>#public_send</code> also wants to support refinements. | |
