I want to use it in the following case.	
<pre>module StringEx refine String do def twice self + self end end end class X using StringEx def meth a a.twice if a.respond_to? :twice end end class Y def twice 42 + 42 end end x = X.new p x.meth Y.new # => 84 p x.meth "homu" # => "homuhomu" p x.meth 42 # nil</pre>
