Split tool/* files to tool and script directories

02/01/2019 07:32 AM - hsbt (Hiroshi SHIBATA)

We use the tool directory for additional scripts like a utility, generator and etc. But some files are required by make and make install. I think they are not the additional scripts, so it's the core toolchain. I found the minimum requirements for autoconf, configure, make, make install, make dist.

```
autoconf

tool/m4/ruby_mingw32.m4
tool/m4/ac_msg_result.m4
tool/m4/ruby_func_attribute.m4
tool/m4/_colorize_result_prepare.m4
tool/m4/ruby_rm_recursive.m4
tool/m4/ruby_setjmp_type.m4
tool/m4/ruby_replace_type.m4
tool/m4/ruby_prepend_option.m4
tool/m4/ruby_default_arch.m4
tool/m4/ruby_check_builtin_func.m4
tool/m4/ruby_cppoutfile.m4
tool/m4/ruby_dtrace_postprocess.m4
tool/m4/ruby_append_option.m4
tool/m4/ruby_try_cflags.m4
tool/m4/ruby_check_builtin_setjmp.m4
tool/m4/ruby_check_signedness.m4
tool/m4/ruby_defint.m4
tool/m4/ruby_universal_arch.m4
tool/m4/ruby_prog_gnu_ld.m4
tool/m4/ruby_check_printf_prefix.m4
tool/m4/ruby_werror_flag.m4
tool/m4/ruby_check_sysconf.m4
tool/m4/ruby_try_ldflags.m4
tool/m4/ruby_stack_grow_direction.m4
tool/m4/ruby_dtrace_available.m4
tool/m4/ruby_decl_attribute.m4
tool/m4/ruby_check_sizeof.m4
tool/m4/ruby_type_attribute.m4
tool/m4/colorize_result.m4
tool/m4/ruby_define_if.m4
tool/m4/ruby_append_options.m4
tool/m4/ruby_check_setjmp.m4
```
How about split tool/* to script/* without the above files?

History
#1 - 02/01/2019 08:14 AM - shyouhei (Shyouhei Urabe)
Hello, I placed tool/ruby_vm files there because I thought they are not needed for release tar balls. Do they?

#2 - 02/07/2019 06:50 AM - hsbt (Hiroshi SHIBATA)
tool/asm_parse.rb
tool/bisect.sh
tool/build-transcode
tool/change_maker.rb
tool/checksum.rb
tool/darwin-cc
tool/enc-emoji-citrus-gen.rb
tool/enc-emoji4unicode.rb
tool/enc-unicode.rb
tool/eval.rb

tool/strip-rdoc.rb
tool/sync_default_gems.rb
tool/test-coverage.rb
tool/test/test_jisx0208.rb
tool/update-deps
tool/vtlh.rb

The above files are staying under the tool directory.

#3 - 02/13/2019 12:31 AM - hsbt (Hiroshi SHIBATA)
- Description updated

#4 - 02/13/2019 12:44 AM - hsbt (Hiroshi SHIBATA)
- Status changed from Open to Assigned
- Assignee set to hsbt (Hiroshi SHIBATA)

I update the two file lists.

- The requirements for autoconf, configure, make, make install, make dist: Move mklib directory. and We should write a test or keep stability.

How about this?

#5 - 07/15/2019 01:41 AM - hsbt (Hiroshi SHIBATA)
- Status changed from Assigned to Rejected

I gave up to organize this. I try to write test files under the tool directory.
