

Ruby master - Bug #16000

How to avoid the need for updating dependencies manually

07/14/2019 08:50 AM - duerst (Martin Dürst)

Status: Closed	
Priority: Normal	
Assignee: nobu (Nobuyoshi Nakada)	
Target version:	
ruby -v:	Backport: 2.5: UNKNOWN, 2.6: UNKNOWN
Description	
Earlier today, I committed 369ff79394765ce198ac7cee872a8c739d895aaa to address issue #15995 .	
This did not lead to any testing failures, but to a dependency problem. As the source code was processed correctly and the tests worked, I did not expect such a dependency problem. It was fixed manually by Takashi Kokubun (thanks!) as follows:	
<pre>New Revision: 18603e9046</pre>	
<pre>https://github.com/ruby/ruby/commit/18603e9046</pre>	
Log:	
<pre>Update dependencies for 369ff79394765ce198ac7cee872a8c739d895aaa</pre>	
<pre>Just copy-pasting diff from</pre>	
<pre>https://travis-ci.org/ruby/ruby/jobs/558407687</pre>	
Modified files:	
<pre>enc/depend.</pre>	
I hope this can be fixed so that such errors can be avoided in the future.

Hint for the dependency update [Bug #16000]

History

#1 - 07/14/2019 10:34 PM - nobu (Nobuyoshi Nakada)

- Description updated

As I guess:

- tool/update-deps takes a pretty long time
- adding dependencies is relatively rare
- saving temporary files would not be common

So it is optional now.

It has just started in these days, and I think it is better that somebody notice the missing dependencies than that nobody notices them. Please be patient for a while.

#2 - 07/30/2019 08:26 AM - nobu (Nobuyoshi Nakada)
