2.5 --> 2.6: backwards incompatible change in MalformedCSVError

Description

In Ruby 2.5, CSV::MalformedCSVError simply inherited from RuntimeError. In 2.6, it defines its own #new, taking 2 arguments (as opposed to the single argument of RuntimeError).

Code explicitly raising new errors of this class outside of the CSV library implementation itself breaks since it doesn't include the second argument (a line number).

History

#1 - 09/02/2019 09:44 AM - nobu (Nobuyoshi Nakada)
- Status changed from Open to Third Party's Issue

Please report it at https://github.com/ruby/csv.

#2 - 09/02/2019 09:47 AM - Spakman (Mark Somerville)
I'll do that.

#3 - 10/11/2019 07:26 AM - mitrill (Aleksey Strizhak)
may close with Won't resolve probably, coz of this:
https://github.com/ruby/csv/issues/104

#4 - 10/11/2019 07:32 AM - kou (Kouhei Sutou)
This is already closed.
"Third Party's Issue" is one of the close statuses.
