Ruby master - Feature #16605
Support argument delegation (...) with blocks/define_method
02/03/2020 04:16 PM - svoop (Sven Schwyn)

**Description**
(I couldn't find anything on this in the bug tracker or other official sources, hope it's not a duplicate since it's kind of tricky to search for it.)

The following doesn't work on Ruby 2.7:

```ruby
define_method(:delegate) do |...|    # <-- syntax error
  target(...)
end
```

Are there any plans to support argument delegation in block arguments?

**History**

It may be that this is a new suggestion, at the least I don't recall a similar proposal although perhaps others thought about it before, since it may make sense (e.g. if you wish to dynamically add methods).
