

Ruby master - Feature #16610

net/imap: support IMAP4 ID extension (RFC2971)

02/05/2020 08:48 PM - nevens (Nicholas Evans)

Status:	Open
Priority:	Normal
Assignee:	
Target version:	
Description	
<p>IMAP servers often strongly recommend clients to report their ID, for usage statistics and bug reports. Clients may also find server IDs useful for the same reasons.</p> <p>Although the RFC requires otherwise, some servers do make it a soft requirement that the ID is reported (and will sometimes even disconnect clients they do not recognize).</p> <p>See https://tools.ietf.org/html/rfc2971 for more details.</p> <p>Implementation: https://github.com/ruby/net-imap/pull/4</p>	

History

#1 - 02/06/2020 11:41 PM - nevens (Nicholas Evans)

- Description updated

#2 - 02/06/2020 11:43 PM - nevens (Nicholas Evans)

- File deleted (0001-net-imap-support-IMAP4-ID-extension-RFC2971.patch)

- File 0001-net-imap-support-IMAP4-ID-extension-RFC2971.patch added

Fixed some bugs in the original patch. Added a test for the request formatting.
