#### Description

In <https://www.ruby-lang.org/en/downloads/>, snapshots links to pub/ruby/snapshot.\* and pub/ruby/stable-snapshot.\* as official snapshot tarballs now.

I want to change links to snapshot tarballs in <https://cache.ruby-lang.org/pub/ruby/snapshot/>.

They created by <https://github.com/ruby/actions/> now.

Tarballs under pub/ruby/snapshot/ have branch name (e.g. ruby\_2\_7) in filenames.  
And they are tested. (but they remain even if tests failed.)

pub/ruby/\*snapshot.\* are not tested.

And there are fewer files under pub/ruby/ without sub-directory recently. (e.g. ruby- 2.7.\* are in pub/ruby/2.7/ only.)

So I want to remove them.

Because of the plan, stable-snapshot.\* are still snapshot of ruby\_2\_6 instead of ruby\_2\_7.

I agree with your proposal. It's difficult to handle for us continuously.

Can we remove it?
