

Ruby master - Feature #16657

Don't ship bundled gems as .gem files as well as in expanded form

Description Working at #16651 , I wonder why the release tarball ships with the bundled gem in form of .gem packages as well as the expanded sources. It would be nice, if one option is chosen. Ideally just the .gem packages, because these are vanilla upstream packages installable via RubyGems without rinstall magic.
