

Ruby master - Feature #16991

Sets: add Set#join

06/26/2020 08:29 PM - marcandre (Marc-Andre Lafortune)

Status: Open	
Priority: Normal

Target version:	
Description I'd like to add #join to Set: # Now: Set[1, 2, 3].join('x') # => NoMethodError # After Set[1, 2, 3].join('x') # => "1x2x3" I'd make this join never recursive. (I've never wanted to use the recursivity of Array#join, but it may very well just be my particular experience) Reminder: Why there is no Enumerable#join: https://bugs.ruby-lang.org/issues/1893
