**Description**

The current version of un.rb httpd shows port number only:

```
$ ruby -run -e httpd
[2021-05-03 21:55:09] INFO WEBrick 1.7.0
[2021-05-03 21:55:09] INFO ruby 3.1.0 (2021-05-03) [x86_64-linux]
[2021-05-03 21:55:09] INFO WEBrick::HTTPServer#start: pid=32129 port=8080
```

To access this server, we have to type http://127.0.0.1:8080 in the address bar of browser.

This feature request appends URLs as follows:

```
[2021-05-03 21:55:15] INFO ruby 3.1.0 (2021-05-03) [x86_64-linux]
[2021-05-03 21:55:15] INFO To access this server, open this file in a browser:
```

This is often useful. Some terminals also make URLs clickable.

**History**

#1 - 05/03/2021 01:29 PM - mame (Yusuke Endoh)
+1

#2 - 08/20/2021 05:57 PM - mame (Yusuke Endoh)
I'd like to merge this PR soon. Let me know if you have any objection.

#3 - 08/20/2021 09:54 PM - Eregon (Benoit Daloze)
Sounds fine to me.
Alternatively this could be part of the default output when starting WEBrick,
I think that would be useful in more situations.

Puma does this for instance.

#4 - 08/23/2021 01:59 AM - gotoken (Kentaro Goto)
- Assignee set to gotoken (Kentaro Goto)
- Status changed from Open to Closed

Alternatively this could be part of the default output when starting WEBrick,

That's a good idea. However, since the definition of the port number output is in the HTTPServer superclass WEBrick::GenericServer, the amount of change is likely to be a little large, so I will leave it for future work. [Thanks for comment anyway.](https://github.com/ruby/ruby/issues/17847)
