

Backport191 - Backport #2472

ri generation problem

12/10/2009 07:43 PM - avsej (Sergey Avseyev)

Status:	Closed
Priority:	Normal
Assignee:	
Description	
<pre>=begin rdoc generates irregular ri documentation when I have class Object in some module create file (source attached) module YAML # # Base class # class Object def foo(opts = {}) "foo" end end # # Another class # class DomainType def bar(opts = {}) "bar" end end end generate ri documentation (output files attached for ruby 1.8 and 1.9.1) with rdoc --ri There is infinite loop in inheritance tree for these classes for ruby 1.9.1. And it not possible to see documentation later. Also you can try to view documentation for YAML::DomainType#new from standart ruby distribution. It has the same problem =end</pre>	

History

#1 - 12/10/2009 10:01 PM - avsej (Sergey Avseyev)

```
=begin
I have just checked on

ruby 1.9.2dev (2009-12-10 trunk 26061) [x86_64-linux]

It's seems ok.
=end
```
