Ruby master - Feature #2480

request to add GC::Profiler.time method

12/15/2009 03:03 AM - rogerdpack (Roger Pack)

Status: Closed
Priority: Normal
Assignee: authorNari (Narihiro Nakamura)
Target version: 2.0.0

Description

```ruby
begin
  currently we have
  GC::Profiler.enable
  # ... stuff
  report = GC::Profiler.result # report is set to a verbose ascii string
end

What I would like is to be able to add garbage time to profiling information [i.e. "within this method, of the total time that was used, GC took 42ms")

GC::Profiler.time
=> float of the total time used (ms).

or could call it time_used or total_time or whatever.

Then it would make adding GC time to profiler time much faster, as I wouldn't have to parse the result output each time to calculate my own total (it would just be a matter of calling Profiler.time, seeing if the time has increased since last setting).

Thanks.
-r
```

```ruby
begin
Hi,

What I would like is to be able to add garbage time to profiling information [i.e. "within this method, of the total time that was used, GC took 42ms")

If anyone (nari?) writes a patch, it can be accepted and committed because no one has disagreed, I guess.

Hi,

2010/3/3 _ wanabe redmine@ruby-lang.org:

File gc_prof_totaltime.patch added

I wrote a patch.
If it is OK, I'll commit later.

+1

The name 'total_time' is also good for me.

Applied at r26814. Thank you.
Many thanks. I will use this in the ruby-prof gem most likely, for more intuitive profiling.
