The formatting options hash passed to the to_yaml methods do nothing.

02/24/2010 04:09 AM - anshul (Anshul Khandelwal)

Status: Closed
Priority: Normal
Assignee: tenderlovemaking (Aaron Patterson)
Target version: 2.0.0

Description

At the moment, there appears to be no documented way to format the output of the various to_yaml methods. They all accept an options hash but the documentation does not specify what options may be passed.

Also, the use of to_yaml_style is undocumented.

class Array
  def to_yaml_style
    :inline
  end
end

results in inline formatting of the resulting yaml. This is not documented anywhere but works.

This is further described in [1] and [2].

Not only is the options hash not documented, it is not working either.

#2 - 04/08/2010 11:23 PM - mame (Yusuke Endoh)

- Priority changed from 5 to Normal

Hi,

Aaron, what do you think about this ticket?

#3 - 04/10/2010 07:39 PM - naruse (Yui NARUSE)

Is this really a bug?
There is no documentation and doesn't work;
it is considered that there was no such function.

So my understanding is, this should be feature request.
Yeah, such function seems useful, but I don't have how it should works.
