ruby -v:	ruby 1.9.1p420 (2010-02-04 revision 26571) [x86_64-linux]
Description	
<pre>=begin Please backport commit r25932 (dup required for force_encoding) in gem_prelude.rb. I get the following error during gem operations: Error loading gem paths on load path in gem_prelude can't modify frozen string internal:gem_prelude:69:in force_encoding' <internal:gem_prelude>:69:inset_home' internal:gem_prelude:38:in dir' <internal:gem_prelude>:76:inset_paths' internal:gem_prelude:47:in path' <internal:gem_prelude>:286:inpush_all_highest_version_gems_on_load_path' I cannot use earlier, recommended ruby 1.9.1 because I need the fix added in: r26568 (merged r26052 from trunk) Thank you very much :) =end</pre>
