Status: Closed
Priority: Normal
Assignee:
Target version: 2.0.0

Description

=begin
The nightly snapshot version fails to generate rdoc with this error:

Generating RDoc documentation
   './ruby.exe -I./lib -I"./ext/i386-mswin32_90" "/path/to/rdoc.rb" --extout 
   "./ext" -- ./bin/rdoc --no-force-update --all --ri --op "./ext/rdoc" 
NMAKE : fatal error U1077: './ruby.exe' : '0xc0000005'
Stop.

I found that ruby fails to run script if -I switch is provided.
