

Ruby 1.8 - Bug #4220

Non-descriptive error when failing to load compiled library

12/29/2010 04:14 AM - harking (George M. Harkin)

Status:	Open
Priority:	Normal
Assignee:	
Target version:	
ruby -v:	ruby 1.8.7 (2010-01-10 patchlevel 249) [x86_64-linux]
Description	
<pre>=begin When loading nokogiri that was compile on a different architecture the error that is given simply states that it could not load nokogiri/nokogiri /usr/lib/ruby/1.8/rubygems/custom_require.rb:31:in `gem_original_require': no such file to load -- nokogiri/nokogiri (LoadError) Expected Behavior: /usr/lib/ruby/1.8/rubygems/custom_require.rb:31:in `gem_original_require': could not load file. Incorrect architecture. -- nokogiri/nokogiri (LoadError) It would be cool if the current arch is listed and what the arch of the target load was. =end</pre>
