

Ruby 1.8 - Bug #4484

Class variables leak to Object when using class_eval

03/09/2011 07:05 AM - pawel (Pawel P)

| ruby -v: | ruby 1.8.7 (2009-06-12 patchlevel 174) [i486-linux] |
| Description | |
| =begin The following irb session describes the problem: String.class_eval { @@string_class_variable = 'should be only in String' } => "should be only in String" "WTF?" if Object.class_variables.include? "@@string_class_variable" => "WTF?" Tested on 1.8 and 1.9. I've created the issue in "ruby-18" project because "ruby" project doesn't allow to create new issues. =end | |
