

Ruby 1.8 - Bug #4548

Gem unpack fails due to missing permissions on /usr/lib/ruby/gems/1.8

Description	
=begin Hi, I had to update Rubygems, but version 1.6.2 has a regression, similar to #3056 . If I use the gem unpack command, it complains about ERROR: While executing gem ... (Gem::FilePermissionError) You don't have write permissions into the /usr/lib/ruby/gems/1.8 directory. I don't think I need permissions to the gems directory to unpack a gem. =end
