

Ruby trunk - Bug #4561

1.9.2 requires parentheses around argument of method call in an array, where 1.8.7 did not

04/07/2011 01:41 PM - dschweigsuth (Dave Schweigsuth)

That has bitten me a few times too, but I accepted it as it is probably clearer in a long expression.
```

```
I'm curious to see why this changed.

It's an intentional syntax change in 1.9.

```
matz.
```

I have run into the same issue today and wasn't sure if it was a bug or intentional. Nice to find both this issue and your recent response.

Out of curiosity, what is the reasoning behind this change? It seems a bit unintuitive that `foo(bar 5)` and `{bar 5}` work, even `[bar { baz }]`, but `[bar 5]` not. All four are enclosed calls without parenthesis. Is there an ambiguity nearby that this syntax change is trying to clarify?
