Description

Hi,

I know this is incomplete in terms of a reproducible problem, but I want to put down what I have now and add to it as I get more info (and/or get told to go raise it as a rails issue...)

```
/Users/kimptoc/.rvm/gems/ruby-1.8.7-p334@p-ecom1/gems/activesupport-3.0.7/lib/active_support/multibyte/unicode.rb:343: [BUG] Segmentation fault
ruby 1.8.7 (2011-02-18 patchlevel 334) [i686-darwin10.7.0]
```

I get the same error when using latest REE too. Dev machine is OSX, but also get it on a Centos Linux VM.

Works ok with latest jruby...

The app is using the parallel gem and making some http/db calls in parallel - some via the soap library savon.

Will try and produce a sample app that reproduces the problem.

Regards,
Chris
