

## Ruby trunk - Feature #5102

### [ext/openssl] Purpose of OpenSSL::PKCS12.new / Allow changing the password

<b>Description</b>		
It seems as if currently creating a PKCS12 with OpenSSL::PKCS12.new is not very useful, all the attributes are read-only. So this could probably be removed or the attributes could be write-accessible, too.		
Apart from that, it would also be nice to be able to change the password of an existing PKCS#12 file.
