Ruby master - Feature #5231

Allow to disable versioned paths

08/25/2011 09:53 PM - vo.x (Vit Ondruch)

Status:	Closed
Priority:	Normal
Assignee:	nobu (Nobuyoshi Nakada)
Target version:	2.6

Description
I don't think that the versioned paths are always necessary, when using prefix is enough for most of the cases. Therefore I am attaching patch which allows to disable them during configuration step. Note that this patch does not disable the version in include directory name, but this can be achieved by using different configuration option.
