Ruby master - Bug #5393

some style fixes in enum.c docs
10/04/2011 03:55 AM - bt (Bernd Homuth)

Status: Closed
Priority: Normal
Assignee: drbrain (Eric Hodel)
Target version: 2.0.0
ruby -v: -

Description
There isn't much consistency in the docs when it comes to blocks. So I decided to go with the style that is most often used: `{obj} block`.
No spaces, only around the block.

I can fix the other classes as well but before I do this let me know if this is the preferred style.

What about multiline blocks? They tend to look ugly. Curly braces everywhere and never ending chains. See https://github.com/ruby/ruby/blob/trunk/enum.c#L2359-2364

I would prefer spaces for both the arguments and the block like `([[args] block]])` as it seems to be the modern style over no space between the curly-brace and the pipe like `((|{|args| block}|))` as it seems to older.

If you submit just a patch for enum.c I can give you better feedback for future clean-ups.

Oops, you call me an old man ;-) Is it in fashion these days, boy?

Nobu, I don't mean to make you feel old, but the extra space is the fashion for us young people. :)

Do you think this patch is OK?
