Ruby master - Bug #5420
RubyGems misleading error message for "update -l"
10/07/2011 06:07 PM - rklemme (Robert Klemme)

<tr>
<td>Target version</td>
<td>2.0.0</td>
</tr>
<tr>
<td>ruby -v:</td>
<td>ruby 1.9.2p290 (2011-07-09 revision 32553) [386-cygwin]</td>
</tr>
</tbody>
</table>

Description
I accidentally used option -l for "update":

```
11:00:34 ~$ gem19 list -l facets
```

*** LOCAL GEMS ***

```
facets (2.9.1)
```

```
11:00:44 ~$ gem19 update -l
Updating installed gems
Updating facets
ERROR: While executing gem ... (Gem::GemNotFoundException)
Could not find a valid gem 'facets' (>= 0) locally or in a repository
```

11:01:15 ~$

The issue is with "... or in a repository": apparently the repository was not even searched because without "-l" it works:

```
11:01:15 ~$ gem19 update
Updating installed gems
Updating facets
Successfull installed facets-2.9.2
Gems updated: facets
Installing ri documentation for facets-2.9.2...
Installing RDoc documentation for facets-2.9.2...
11:03:56 ~$ gem19 list -l facets
```

*** LOCAL GEMS ***

```
facets (2.9.2, 2.9.1)
```

11:04:21 ~$

- Category set to lib
- Target version set to 2.0.0

=begin
It seems this has been fixed.

$ GEM_HOME=~/.tmp/gems/ GEM_PATH= ruby20 -Ilib bin/gem update -l builder
Updating installed gems
Updating builder
Fetching: builder-3.1.4.gem (100%)
Successfully installed builder-3.1.4
=end
